The USER needs a way to identify :

- ➢ Whether he/she in abnormal condition by analyzing symptoms.
- ➢ Whether he/she need to or need not to consult a doctor.
- ➢ Notify when he/she is in risk.
- ➢ Improve the quality of care.
- ➢ Keep up to date medical records by analyzing for doctors.

PROBLEM STATEMENT:

- ◆ Ajay is feeling afraid that he is experiencing symptoms like high blood pressure and dizziness. Thinking that he made suffer from heart disease .Due to improper intake of tablet .he is afraid of visiting doctor's .so, it needs to know what is shift condition without consulting doctor.
- ◆ Kumar has a chance of having a heart attack. So, He want to keep up date for his medical condition without going to hospital for earlier prediction.

- Shanthi ,who is a diabetics patients walking on the road side. She wore a smart watch. Suddenly, She fainted but there is no one around.
- John had a wheezing and irregular heart beat which is in serious condition but he didn't know about it and never visited doctor about these condition.
- Rosy is an women who thinks about proper advice/ treatment is provided directly by visiting doctor. Suddenly one day, she was in abnormal condition in home alone during lock down. SO how can she visit her doctor.
